About Austin Health

Austin Health is one of Victoria's largest health care providers. Comprising the Austin Hospital, Heidelberg Repatriation Hospital, Royal Talbot Rehabilitation, Hospital in the Home and community based health services; Austin Health is an internationally recognised leader in clinical teaching, training and research, with numerous university and research institute affiliations.

Austin Health employs near 9,000 staff across its sites; including over 1,600 doctors and 3,000 nurses, and delivers a full range of leading edge clinical services, including several state-wide services (liver transplant, spinal cord injury service, respiratory support service, child inpatient mental health service). In total, Austin Health provides over 900 beds, including mental health, aged-care and rehabilitation beds and a range of community and in the home services. The current annual operating budget is in excess of \$960 million.

Austin Health delivers vital state-wide services to all Victorians, including to diverse multicultural and veteran communities. It also provides community and specialty services to the people of Melbourne's north-eastern corridor in a safety-focused, team-oriented and stimulating work environment.

Austin Health's current vision is to change healthcare for the better through world class research, education and exceptional patient care.

Our values define who we are, shape our culture and the behaviours, practices and mindset of our people. Our values are: Our actions show we care, we bring our best, together we achieve and we shape the future. www.austin.org.au/about-us

Austin Health is committed to providing an inclusive culture where all employees can contribute to the best of their ability and strive to develop further. Find more at <http://www.austin.org.au>

Position Purpose

The objective of this position is to be a combined clinical and research post providing direct clinical and research experience, as well as multidisciplinary clinics in the public system at the Austin hospital.

- The Fellow will be expected to undertake Hepatology based research during the 12-month term. A number of clinical projects will be available under the supervision of Dr Marie Sinclair, A/Prof Paul Gow and A/Prof Adam Testro.
- The Fellow will participate in Hepatology clinics with multidisciplinary focus including, medical, dietetics and psychiatry, to enhance their understanding of assessment and management of patients referred for liver transplantation.
- The Fellow will gain experience in the inpatient care of Hepatology patients.
- It is expected that the Fellow would be involved in over 24 Hepatology consultations per week or more than 1000 per year.
- Attendance and participation in multidisciplinary clinics including Hepatoma and pre and post Liver Transplant.
- Provide Leave cover for Unit consultants either for outpatients or endoscopy sessions.
- Provide support and teaching to resident and Registrar medical staff through direction and management of patients.

About Gastroenterology

The Department of Gastroenterology and Hepatology provides tertiary referral services in general Gastroenterology, Inflammatory Bowel Disease, Hepatology and Endoscopy across both the Austin and Repatriation campuses, as well as statewide services to Victoria and Tasmania for the treatment of acute and chronic liver failure.

It is also responsible for the medical management of Liver Transplant recipients at both the Austin and the Royal Children's Hospital, and provides Gastroenterology consultation and Endoscopy services to the Mercy Hospital for Women, which is co-located with the Austin.

Endoscopy procedures are performed in the Austin operating theatre complex, situated on Level 2 of the Harold Stokes building and in the Surgery Centre on the Repatriation Campus. There is a fulltime Head of Endoscopy and an Endoscopy Nurse Unit Manager who are responsible for the administration of Endoscopy services.

The Unit has strong commitments to teaching, clinical research and basic laboratory investigation, and there is a close link between the Units' research and clinical activities. Its special expertise in the management of liver disease and strong clinical research program attracts large numbers of patient referrals throughout Victoria, interstate and overseas.

It is recognised that the highly specialised services provided by the Department needs a wider range of skills that any one gastroenterologist could have. Therefore, individual Gastroenterologists will need to bring their own set of skills that will complement those of others, and enable the department to provide a comprehensive service.

Determining a practitioner's scope of practice will help protect the practitioner from demands that might be outside their area of expertise, and helps facilitate the allocation of clinical responsibilities to those with the most appropriate skills and experience.

Purpose and Accountabilities

Role Specific:

Clinical Care

- Provide comprehensive medical care of inpatients and outpatients under the care of the Liver Transplant Unit of the Austin Hospital.
- Participate in Unit meetings and activities.
